

# Quick Check

## Alpha-1 Antitrypsin Deficiency (Alpha-1) Therapy Documentation

### Essential Data

Minimum information required to fully process a referral:

Patient demographic sheet (including documentation of being a non-smoker)

Copy of insurance card

Prescription (including drug name, dose and frequency)

Pulmonary function tests (including forced expiratory volume in 1 second [FEV1] volume)

Graded exercise test results

Supporting diagnostic test results (including Alpha-1 level, phenotype, arterial blood gas, liver function, computed tomography [CT] scan, x-ray documenting emphysema)

History and physical (including height, weight, allergies, clinical history of emphysema, family history of Alpha-1, treatment history, infection history and hospitalization history, homebound status)

Letter of medical necessity (if available)

Immunology profile, including immunoglobulin A (IgA) level (if applicable)

### Common ICD-10 Codes for Alpha-1

ICD-10 Code	Description
E88.01	Alpha-1 Antitrypsin Deficiency

Call **1-866-899-1661** or fax **1-866-843-3221** for questions. Go to **CVSspecialty.com > For Health Care Providers** to access our Alpha-1 enrollment form or contact your local representative. To avoid delays, please complete the enrollment form in its entirety.

# Alpha-1 Therapy Services

## Coordinated delivery, dedicated care

CVS Specialty® and Coram® CVS Specialty® Infusion Services (Coram) are pleased to provide one of the most comprehensive offerings of Alpha-1 care in the industry, including:

- Safe and convenient treatment options in the home or in our local ambulatory infusion suites
- Access to Aralast NP, Glassia and Zemaira
- Coram's Patient Advocacy Program, designed to help patients manage the complexities of Alpha-1

## Comprehensive management

- High-touch engagement with registered nurses and pharmacists trained in Alpha-1 infusion therapy administration and treatment
- Personalized home education, ongoing clinical support and care tailored to your Alpha-1 patient's individual needs
- Clinical expertise with infusion therapies, including anti-infectives, immunoglobulins, and pre- and post-transplant regimens

## The Coram Patient Advocacy Program

- Provides 24/7 clinical access, lifestyle support, care management and therapy guidance
- Peer-mentoring offered by our dedicated customer advocates and patient relation specialists
- Navigation of insurance requirements and connection to financial assistance resources
- Robust clinical appeals support for Alpha-1 therapies

## Start Alpha-1 patients on therapy today:
